Summary

Full-stack Software Engineer with experience building and owning enterprise applications end-to-end. In addition to development, actively participated in requirement discussions and early feature planning, developing a strong interest in problem definition and prioritization. Seeking to transition into product roles where I can combine technical depth with structured, user-focused decision making.

Experience

Mindera Oct 2025 – Mar 2026

Software Engineer *Chennai, India*

- **Service Portal (In-House Reconciliation System)**
  - Owned the end-to-end product lifecycle, managing requirement analysis, feature prioritization, and final deployment to support internal teams.
  - Streamlined internal operations by delivering key feature upgrades, effectively balancing technical execution with system reliability and performance.

- **Retail Fraud Detection (PoC)**
  - Conceptualized and developed an independent product prototype to pitch to prospective clients, identifying a market opportunity in retail fraud prevention.
  - Built a real-time tracking system and a scalable backend architecture to handle continuous data ingestion and processing.
  - Engineered data features and evaluated multiple machine learning models to optimize fraud detection accuracy and business viability.
  - Orchestrated automated pipelines and containerized the final product to ensure seamless deployment and scalability for client demos.

Mindera Feb 2025 – Sep 2025

Software Engineering Intern *Bangalore, India*

- Built and launched features for internal applications, including a custom survey-creation tool that improved data collection.
- Converted to a full-time Software Engineer based on strong performance, independent problem-solving, and a focus on user needs.

Education

Sri Ramachandra Institute of Higher Education and Research 2021 – 2025

Bachelor of Technology in Computer Science (AI & Data Analytics) *Chennai, India*

Skills

Product & Execution: Project Ownership, Requirement Gathering, Agile/Scrum, Feature Prioritization, Client Pitching

Languages & Web: Python, JavaScript, SQL, HTML/CSS, React, Node.js, REST APIs

Data & ML: Data Analysis, Machine Learning Fundamentals, Predictive Modeling, AI Prototyping

System & Deployment: System Architecture, API Integrations, Cloud Deployment, Release Management
